

HRISHIKESHAN DAS

Developer / DevOps-Oriented IT Professional

+91 99817 98611 | contact@hrishikeshandas.online | www.hrishikeshandas.online

PROFESSIONAL PROFILE

Junior developer and IT professional with practical experience across web and mobile application development, hosting configuration, networking, and manufacturing ERP workflows. Built and deployed KharchaTrackr, a real-world expense tracking application for web and mobile using Flutter and Firebase. Strong foundation in responsive UI development, Firebase, JavaScript, and modern AI-assisted development tools, with a clear motivation to grow into an international software development or junior DevOps role.

CORE SKILLS

- Programming and web: JavaScript, HTML5, CSS3, REST APIs
- Frameworks and platforms: Flutter, React.js, Node.js, Firebase
- Databases: Firebase Firestore, MySQL
- Tools: GitHub, VS Code, Cursor, GitHub Copilot, ChatGPT, Codex
- Infrastructure and support: hosting management, domain and DNS setup, email configuration, network and hardware support
- Business systems: ERP web application workflows for manufacturing environments

PROFESSIONAL EXPERIENCE

Developer and Network Engineer

Manufacturing Industry Environment, India | 2019 - Present

- Provide IT, networking, hardware, website, hosting, and software development support within a manufacturing business environment.
- Manage website hosting, domain configuration, email setup, and general web administration tasks.
- Support ERP-related web application workflows used in manufacturing operations.
- Develop independent software projects while transitioning from infrastructure support into web and application development.
- Use modern development and AI-assisted coding tools to improve productivity, troubleshooting, and implementation quality.
- Continue structured self-learning in React, Python, backend development, and DevOps-oriented practices.

PROJECT EXPERIENCE

KharchaTrackr - Expense Tracking Application (Own Idea)

Web and mobile application | Flutter, Firebase, JavaScript, REST APIs | kharchatrackr.online

- Built and deployed a complete expense tracking application with income and expense management features.
- Integrated Firebase backend services, authentication, and real-time data handling.
- Designed responsive, user-friendly interfaces for mobile and web users.
- Implemented dashboard functionality to help users monitor financial activity clearly.
